

Who We Are

In 1960, we started our commercial life in Simav district of Kütahya.

We operate with our 310 qualified personnel in our production facilities with a total closed area of 24.000 m2 at three different locations .

Values

**Consciousness to Customer
Expectations**

**Flexibility in Meeting
Requests**

**Diversity in Products
and Services**

**Customer Aptitude
Motivation and Dynamism**

**Fast and Secure
Delivery**

**Empowering
Women at Work**

**Happy Working
Environment**

Our Fields Of Activity

We supply to Automotive, Agricultural Vehicle and Construction Machinery sectors;

- Pressure tube and hose assemblies,
- Machining Parts,
- Steering Parts,
- Cold Formed Products

Machining

- In the Machining Department; there are CNC Lathes, CNC Machining Center, Universal Lathes, Milling Cutters.
- 1300*600 mm Machining Center Capacity, In this section, which has a turning capacity up to Ø240 mm, Steel, Stainless Steel, Aluminum, Brass, Copper and Special Alloy Material Types are machined at precise tolerances.

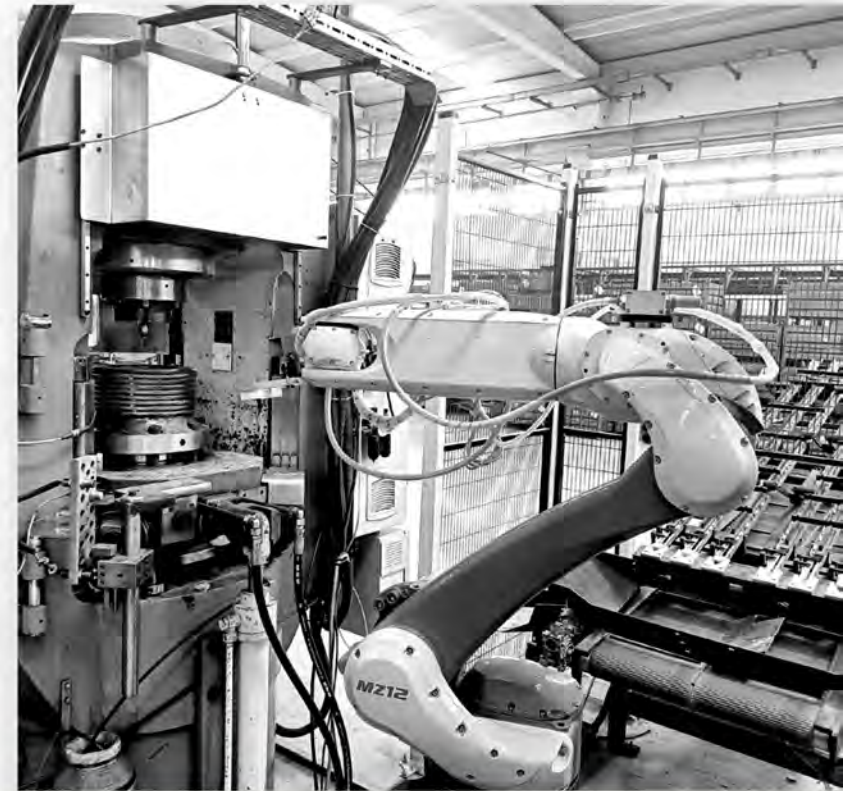

Tube And Hose Assembly

- We have ability and capability of bending Steel, Aluminum, Copper, Brass, Stainless and Bundy tubes from Ø4 mm to Ø80 mm in the Tube Assemblies Line.
- Countersink, camber, diameter reduction and diameter enlargement operations can be performed on pipe ends from Ø4 mm to Ø80 mm
- We offer our customers coordinate measurements, surface roughness, and internal contamination analysis of the produced pipes using state-of-the-art laboratory equipment in accordance with standards.
- In addition to high and low pressure hose assemblies in automotive, tractor and construction equipment industries, shaped Polyamide hose assemblies are also produced.

Cold Forming

- We have an annual forging capacity of 28 million pieces in the Cold Forging department
- Forming of many parts especially for Link Stabilizer, Axial Joint, Ball Joint and Tie Rod housing is carried out.
- KAZCIOĞLU INDUSTRIAL, which has one of the highest capacity Cold Forging facilities in Turkey, also produces Aluminum Cold Forging for the strongest brands of the sector.

Steering Parts Production

- In the Steering Systems section; Rod Assembly, Tie Rod and Axial Joints are produced for the Tractor and Construction Machinery sector and presented to the world market under the FABBRO brand.
