# Vision

To be an OTC company that protects sustainable growth with the values we create in the Turkish market by fulfilling the requirements of the purpose of our establishment, is preferred with its competitive power, is trusted, sensitive to the environment and people. With our reliable team, powered by our innovation-oriented entrepreneurial spirit, we produce pioneering nutritional supplements in the sector, making the success we have achieved as the first choice OTC company of consumers and creating permanent advantages by making a difference.

# Mission

To create natural, innovative, and safe products that improve human health. In line with this goal, to develop natural support products that are as old as human history with science and modern production facilities. Our expert staff, who scientifically examine natural and reliable products, whose traditional use in preventive treatment is as old as human history. To offer them to humanity by developing them with the possibilities of modern medicine. To focus on producing solutions that will add value to human life within our sector, the commitment we make to the people working in the company, the societies we operate in, and the service culture we have for the consumers who buy our products.

# MANUFACTURING **PLANTS**

# Nuvita

Established in 2012, NUVITA Pharmaceutical is a 100% Turkish food supplement manufacturing company with a high-grade facility that conforms to the international standards with the mission of focusing on human health. Nuvita manufacturing plant is designed in accordance with GMP and ISO Food Safety standards in an effort to achieve the highest quality production, and has a validated ventilation system, a pure water system, and is equipped with modern production technologies that meet the needs of our customers. Our products are developed to meet international standards with an innovative approach in formulation design, raw material and packaging materials selection at the R&D stage, and are monitored and analyzed at every stage of production.

# Production Line of Nuvita

## R&D and Quality Assurance

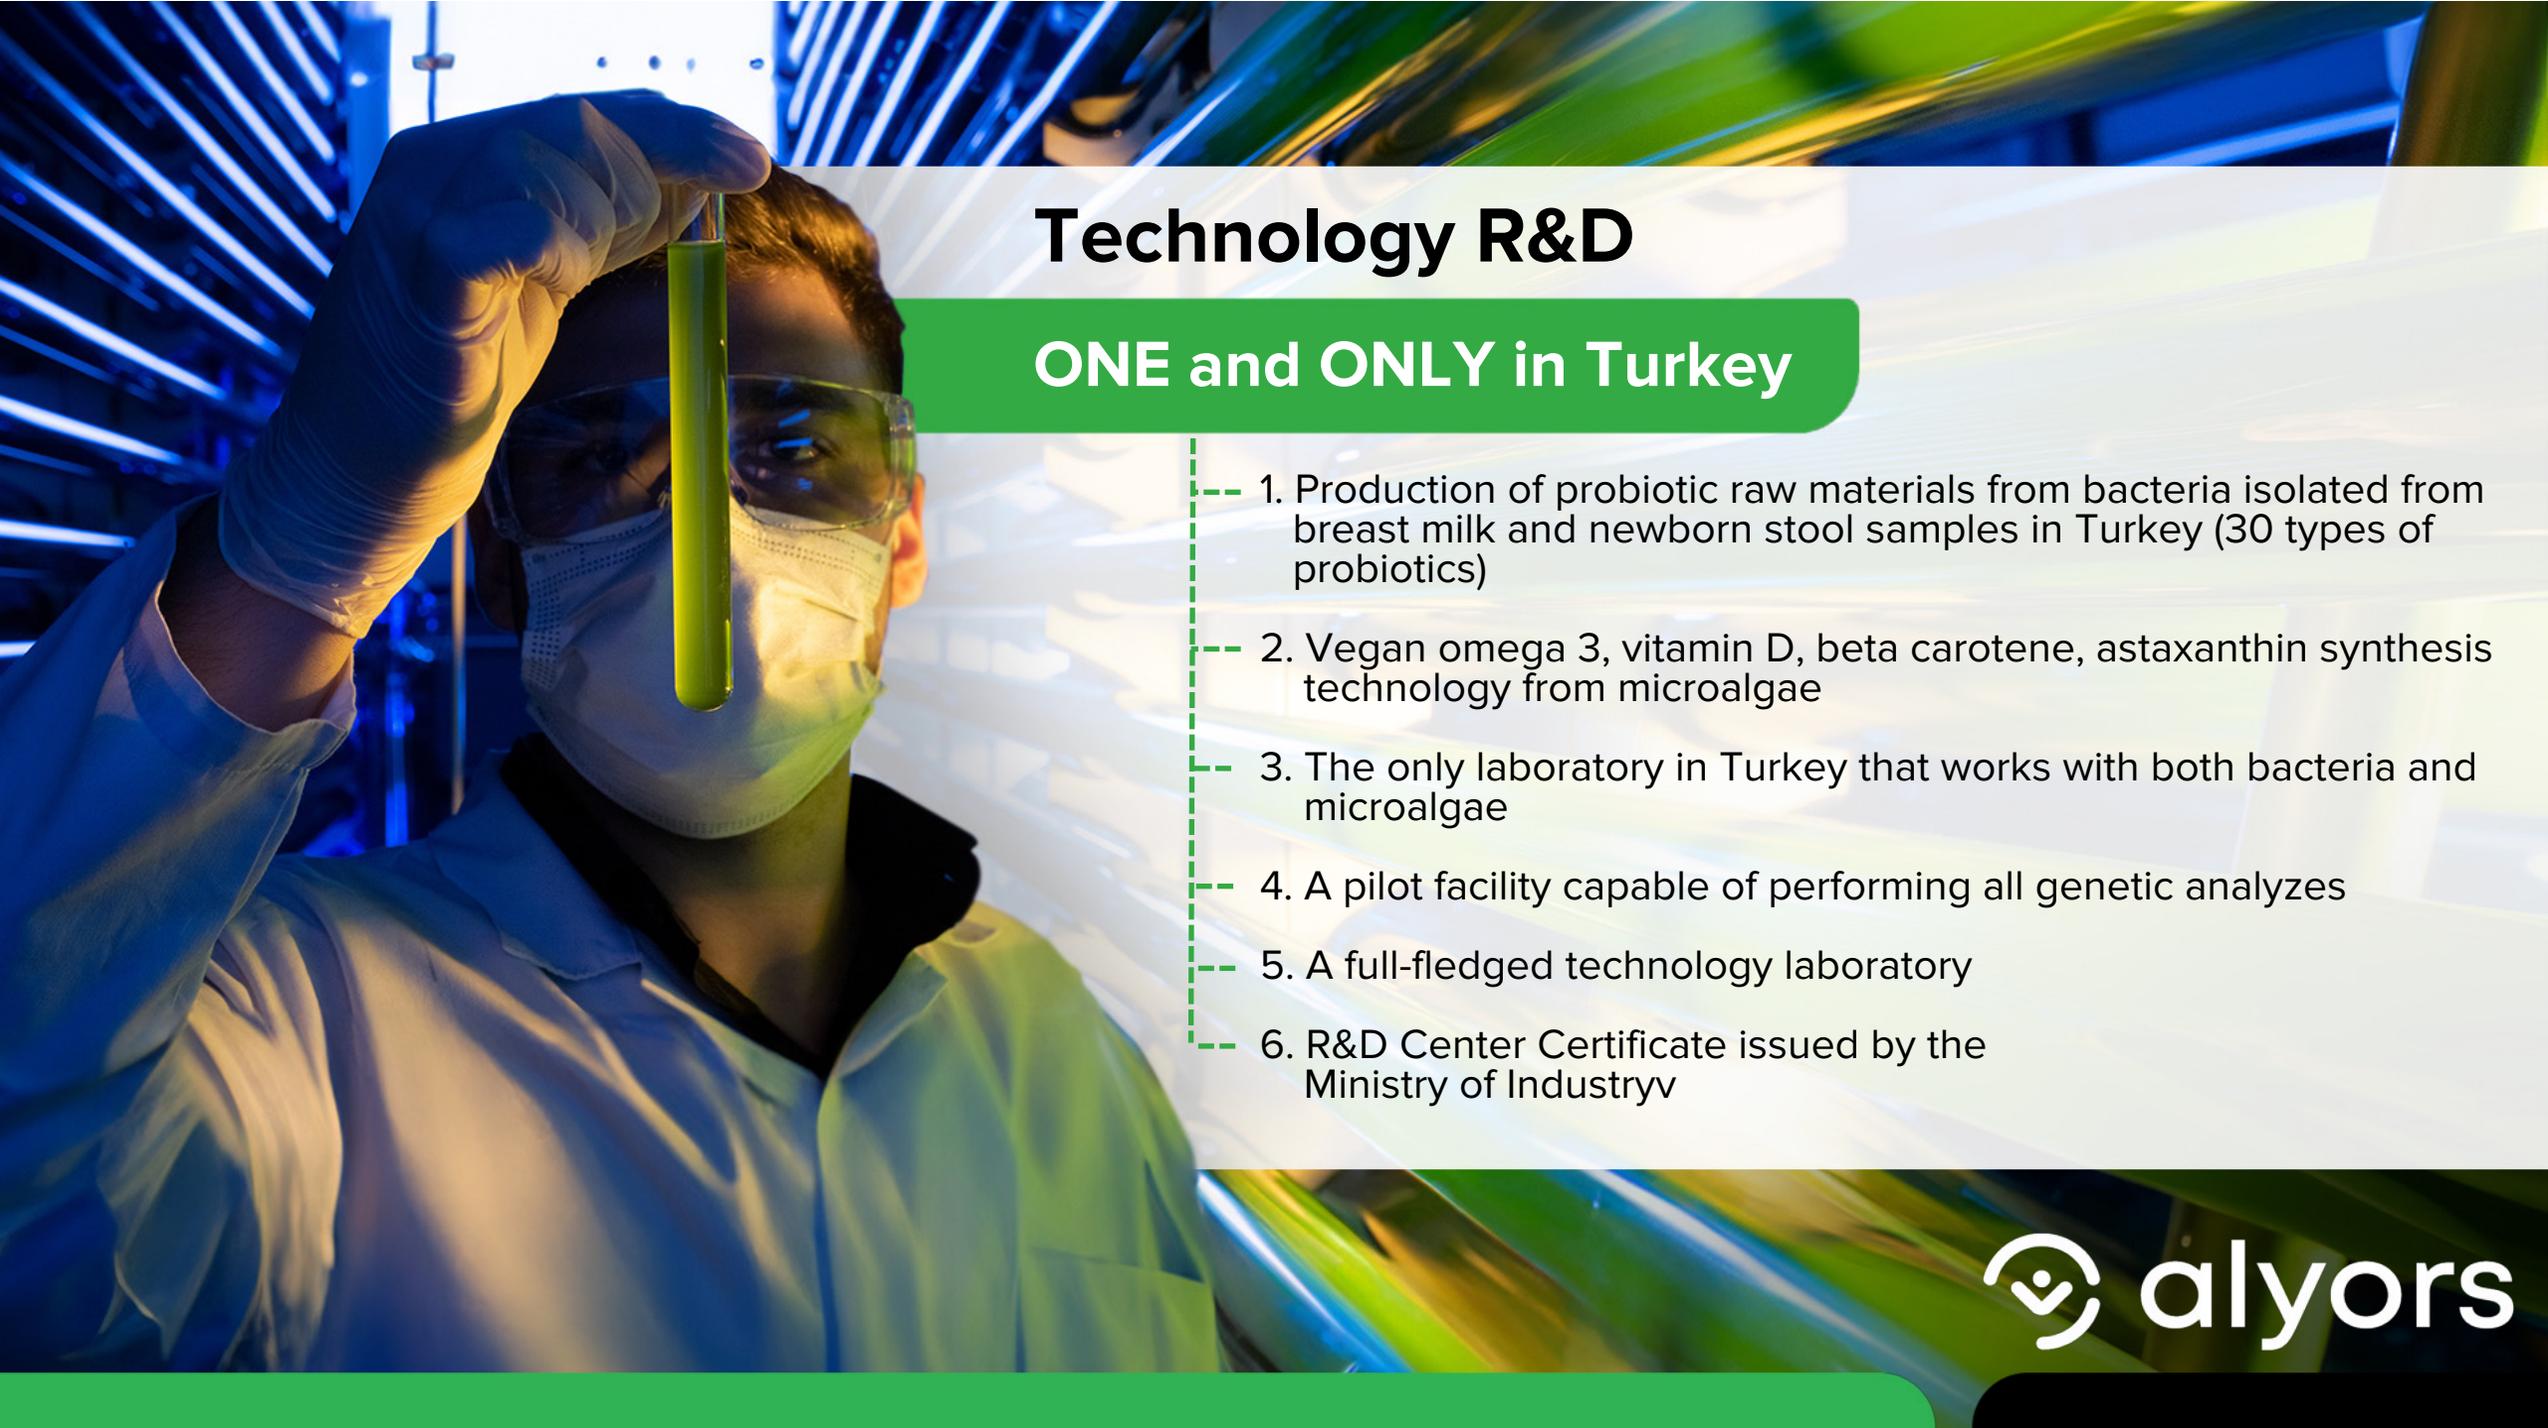

The products are developed to meet international standards with an innovative approach in formulation design, raw material, and packaging materials selection at the R&D stage and are monitored and analyzed at every stage of production. All of the formulations are designed with a scientific approach by our expert staff including doctors and

pharmacists in the R&D laboratories equipped with superior technology. Ensuring customer satisfaction by producing on-time, accurate, high quality and reliable products are the main goals of Nuvita. Product quality assurance and continuity are guaranteed within the framework of IFOS, GMP, WHO, GOED and HALAL standards.

**NUVITA**  
**BIOSEARCH**  
R&D CENTER

*The*  
**MOSSI**  
LONDON

## The Mossi London

Established in 2014, The Mossi London is a manufacturing company in line with the Cosmetic Product Production Legislation and GMP requirements. The Mossi London carries out innovative dermocosmetic products that aim to improve skin and hair health quality, focusing on the design, development, and marketing of cosmetic products. Our manufacturing facility has high flexibility capabilities and is determined by the Made to Order principle. We offer the opportunity to benefit from much more extensive production opportunities with our wide range of dermocosmetics.

# Production Line of The Mossi London

## Iyon Medical

Established in 2008, Iyon Medical produces private-label medical products that meet the standards of ISO and CE and has registered trademarks and quality certificates. Thanks to our successful R&D activities, we became the first insulin pen needles and seawater producer in Turkey. Iyon Medical was established to import "Insulin Pen Needle Tip", and as a result of successful R&D studies, we established our own production facility. We are of being the first manufacturer of "Insulin Pen Needle Tip" and the first "Ocean Water" producer in Turkey. Both products received Project Success Appreciation with the support of TUBITAK.

# Production Line of Lyon Medical

# Damla Health

Established in 2008, Damla Health produces a wide range of medical products such as bandages, cotton pads, and gauze with international standards in the medical field. Damla Health has set the main goal of producing reliable, hygienic products at international standards and being one of the leading organizations serving the health sector. Our quality management system is designed in accordance with ISO 9001:2015 and ISO 13485 standards to ensure customer satisfaction and continuously improve the quality of our products.

# Production Line of Damla Health

# Biocell

Founded in 2020, Biocell is a herbal raw material company established to meet the market's need for quality raw materials, engaged in product development and marketing activities for the medicinal plants, pharmaceutical, food supplements, cosmetics, and feed sectors. In the short term, work on the production of 20 herbal extracts continues at full speed. Biocell is strongly nurturing its production targets with state-of-the-art facilities, R&D studies, university and related industry components and most importantly, a focus on science. The supply of product inputs and the export of these supplies will also constitute Biocell's near-term business model development branches.

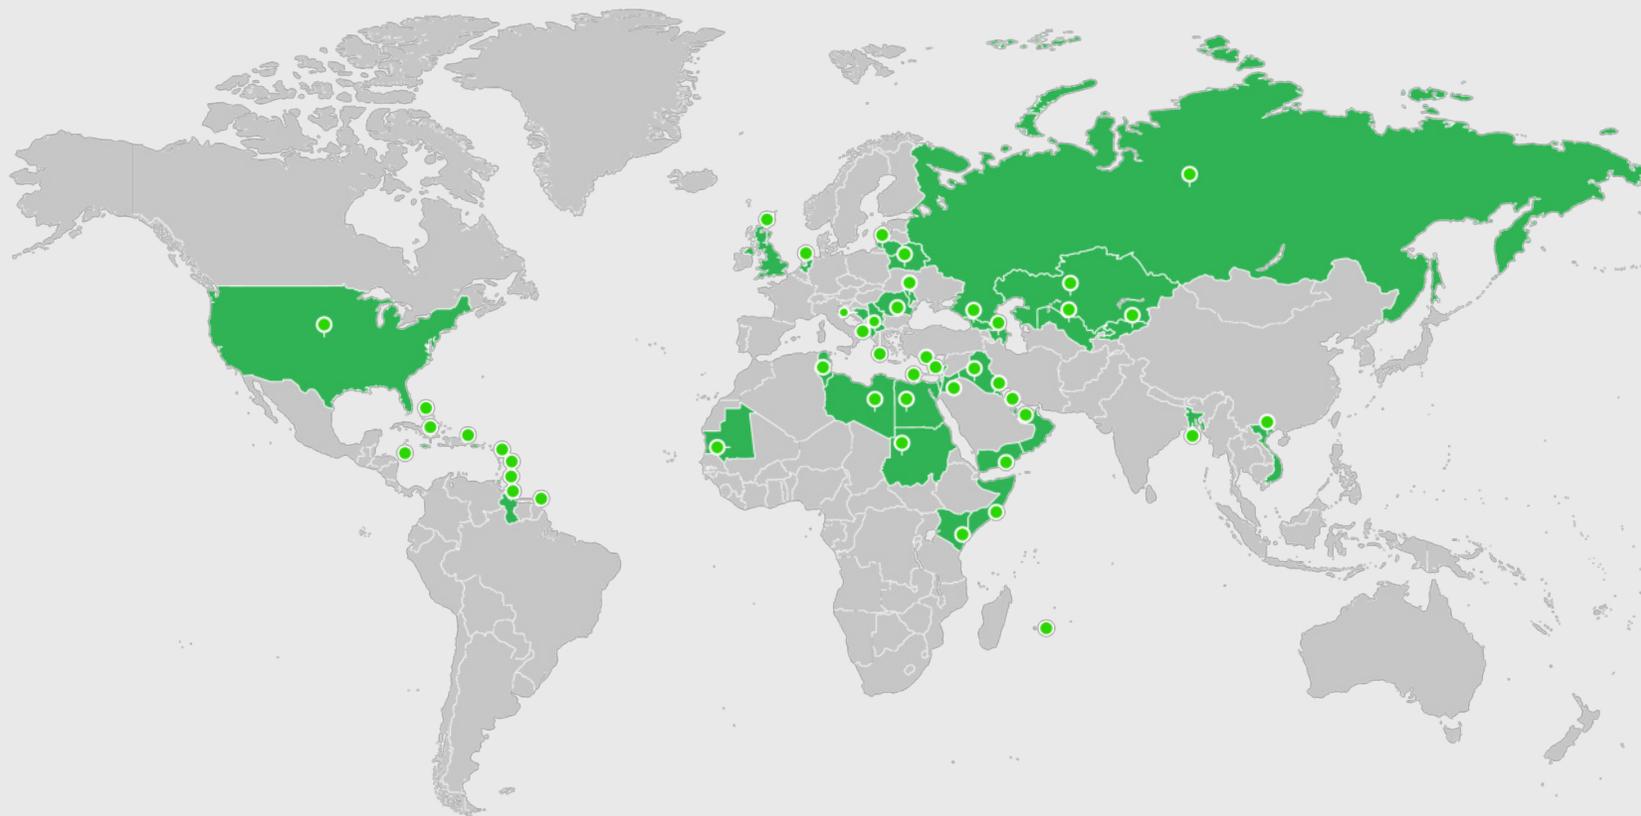

# Gummy Worlds

Gummy Worlds is a nutraceutical company founded in 2022 to develop and manufacture the highest quality forms of healthy and innovative gummies. The factory carries out production, storage and R&D activities of chewable food supplements at European standards. Gummy production activities are approved by the relevant ministries and all products are ISO 9001, ISO 22000, Halal, GMP, BRC certified by internationally accredited organisations. Gummy Worlds, which has the capacity to produce 1000 tones gummies per year, offers solutions for the production needs of private label customers as well as its own products with its continuously developed product range.

# Warehouses with GMP Standarts
