

MASTER - K

(Ultra Power)

It is a high quality potassium fertilizer containing polymerized potassium actives and enzymes of plant origin and resulting from the photosynthetic process and synthesis.

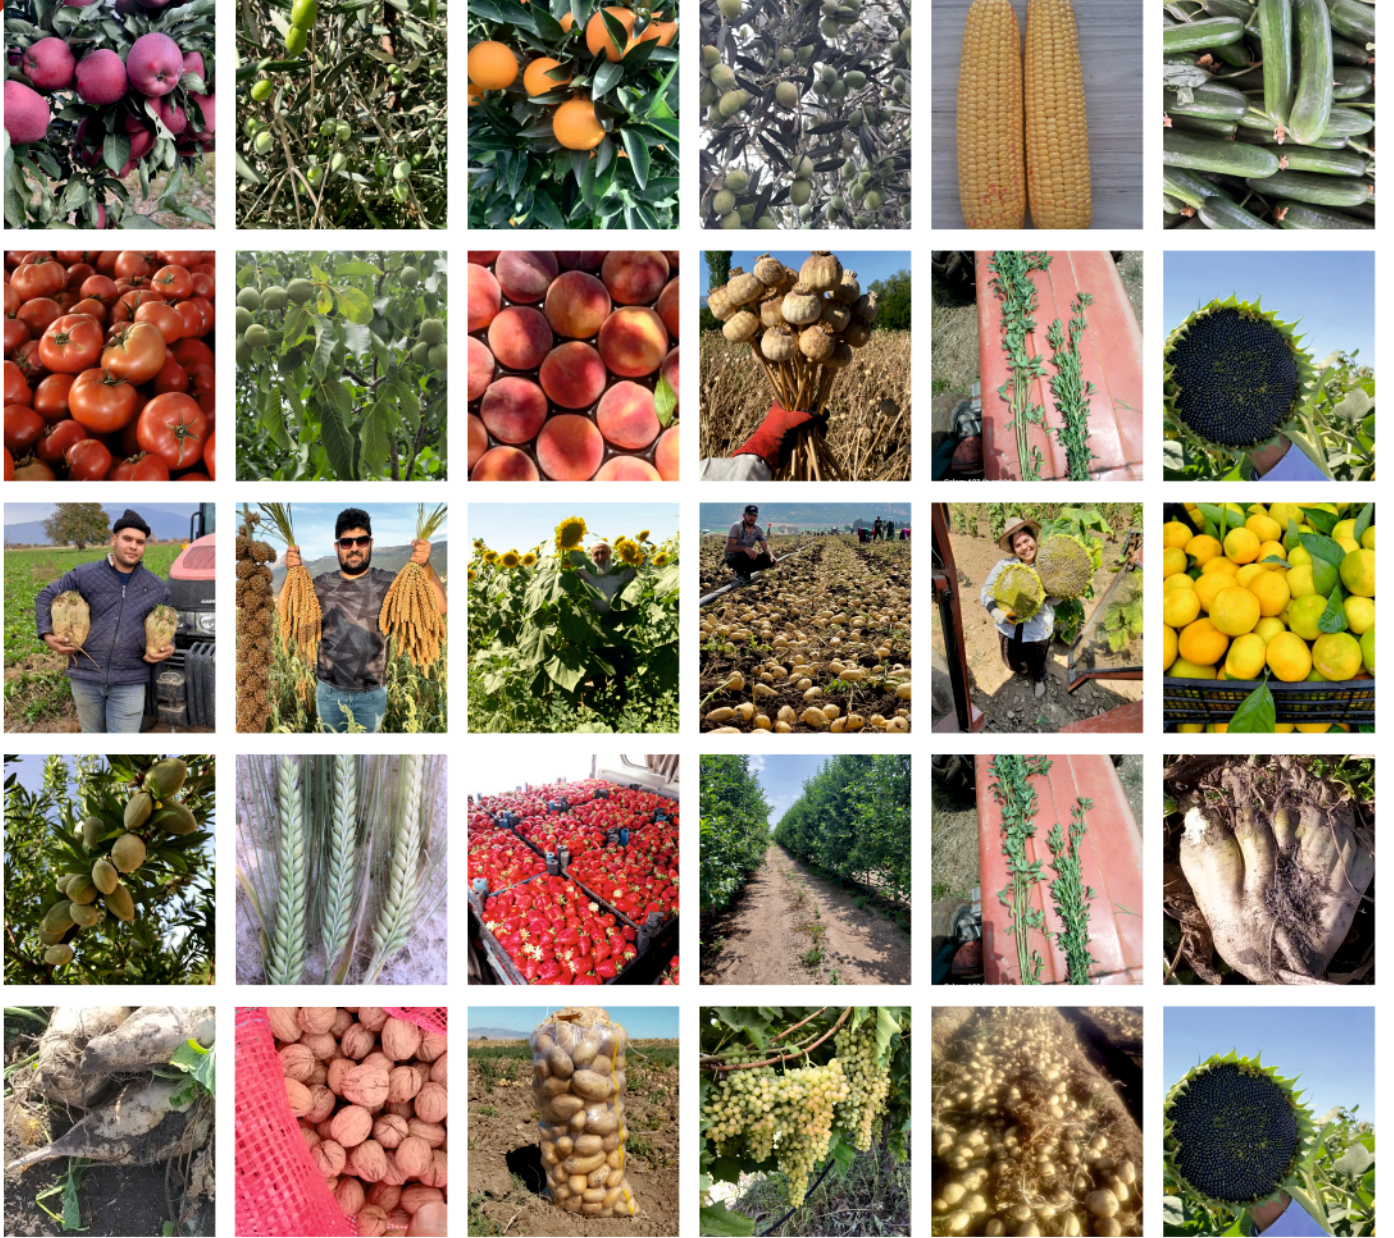

MASTER K			
KULLANIM ALANI AREA OF USE	KULLANIM ZAMANI TIME OF USE	KULLANIM YÖNÜ VE MİKTARI USAGE METHOD AND AMOUNT	
		YAPRAKCIK FOLIAR	DAMLAZIRAN DRIP
Pomac, Patates Beyincot, Potatis	Bili yaprakları 20 cm olduğunda When the plant leaves are 20 cm	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Kavak, Karpuz, Kaktus Makas, Viskumulus, Pampul	Maye tutumdan ilaasen Pure full soil	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Çilek Strawberry	Bili yaprakları 18 cm olduğunda When the plant leaves are 18 cm	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Famula, Mikut, Dapritay, diğer bitkiler Basma, Çikilpasa, Pasa, diğer legumae	Bili yaprakları 18 cm olduğunda When the plant leaves are 18 cm	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Patlayıcı ve ya İstikil (Çavdar, Çavdar, İstikil, Patlayıcı, Çavdar) Vegetables, greenhouse and field crops (Tomato, Cucumber, Pepper, Eggplant, Cucumber)	Maye tutumdan ilaasen Pure full soil	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
İstikil Corn	Polikloron Sıcak Before tasseling	100 lile suya 250 cc 250 cc per 100 liters of water	1-2 lile / da 1-2 liters / da
Pamuk Cotton	Kısa açma öncesi Before covering	100 lile suya 250 cc 250 cc per 100 liters of water	1-2 lile / da 1-2 liters / da
Arpa Barley	Bili yaprakları 15-20 cm olduğunda When plant height is 50-60 cm	100 lile suya 250 cc 250 cc per 100 liters of water	1-2 lile / da 1-2 liters / da
Çavdar, İstikil, Patlayıcı Mikut, Mikut, Mikut, Mikut, Mikut	Maye tutumdan ilaasen Pure full soil	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
İstikil, Arpa, Mikut, Çavdar, Çavdar, Çavdar, Çavdar Vegetables, greenhouse and field crops (Tomato, Cucumber, Pepper, Eggplant, Cucumber)	Maye tutumdan ilaasen Pure full soil	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Pamuklu Arpa, Çavdar Cotton, Barley, sorghum	Maye tutumdan ilaasen Pure full soil	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Arpa Barley	Kısa açma öncesi Before covering	100 lile suya 250 cc 250 cc per 100 liters of water	15-20 gün aralıkla 1-2 lile ila 1-2 liters illa at 15-20 days intervals
Arpa, İstikil, Patlayıcı, Çavdar, Çavdar, Çavdar, Çavdar Barley, Wheat, Oats, Paddy	Sıcak iklimlerde During the hot period	100 lile suya 250 cc 250 cc per 100 liters of water	
Çilek Strawberry	Tamamla ilaasen, her ilaasen During the hot stage, after each picking	100 lile suya 250 cc 250 cc per 100 liters of water	
Arpa, Larnas Barley, Larnas	İstikil yaprakları ilaasen During the development period of plants	100 lile suya 250 cc 250 cc per 100 liters of water	
Arpa, Larnas Barley, Larnas	Bili yaprakları 40-60 cm olduğunda When plant height is 40-60 cm	100 lile suya 250 cc 250 cc per 100 liters of water	
Arpa, Larnas Barley, Larnas			

- It is a new generation leaf and drip fertilizer containing high quality potassium, offering different and effective solutions to quality and calibration problems.
- It meets the high potassium needs of plants thanks to its very strong content.
- Thanks to the active potash in its content, it quickly penetrates into the fruit of the plant and shows a growth effect in a short time of 4-8 hours.
- It directly affects the quality and caliber of vegetables and fruits.
- It increases the aroma of vegetables and fruits. It makes vegetables and fruits look brightly colored.
- It directly contributes to the extension of the shelf life of vegetables and fruits after harvest.
- It acts as an organochelator when used with other fertilizers.
