WALL PANELS

New Generation Stone Wall Panels

An easy-to-apply solution to create refined interiors

izemexport.com
info@izemexport.com

Refurbishing the beauty of marble through innovation.

Izem Stone introduces the beauty and elegance of marble to modern interiors without the hassle of its handling and installation; creating refined spaces with ease.

WHY IZEM WALL PANELS?

LIGHTER WEIGHT

2X LIGHTER WEIGHT

Izem Stone panels are 2 times lighter than average marble tiles due to their acrylic based structure.

EASY TO CARRY AND HANDLE

Izem Stone panels can easily be carried, stored, and lifted due to their lighter weight compared to marble.

NO EXTRA WEIGHT TO THE BUILDING

Unlike marble, Izem Stone panels do not introduce extra weight to the structure and are suitable for old buildings.

EASY INSTALLATION

3X FASTER INSTALLATION

Your time matters. Izem Stone can be installed 3 times faster than regular ceramic and marble tiles.

DUST FREE, EASY DIMENSIONING

Izem Stone panels can easily be dimensioned with a circular saw. Do not soak yourself and surroundings in dust with stone cutting tools.

NO DEMOLITION WORK NEEDED

You can directly install Izem Stone panels onto existing tiles and other types of surfaces without dismantling the old surface.

RELIABILITY

GERM FREE

Izem Stone panels have antibacterial quality confirmed by laboratory tests. They do not harbor any pests or mold.

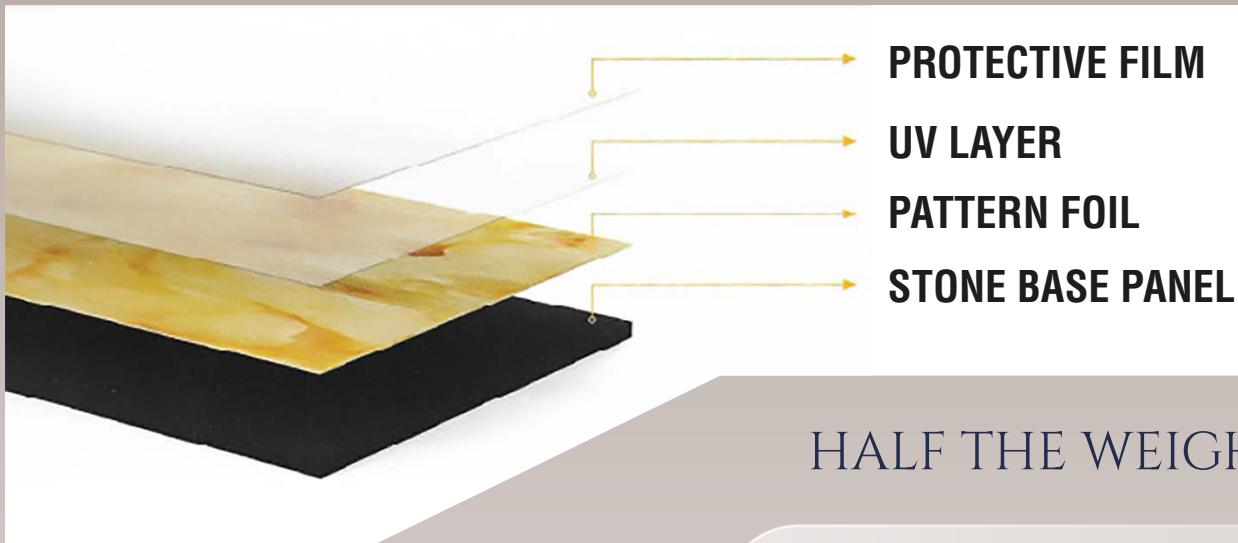

WATER RESISTANT

Izem Stone can confidently be installed to wet rooms. The panels are resistant to water and do not lose surface quality due to humidity.

FIRE RESISTANT

Izem Stone is fire resistant and do not release any toxic fumes in case of a fire. It is suitable for B1 level fire certification.

3.5 MILLIMETERS THIN

HALF THE WEIGHT

We have compressed the beauty of marble into only 3.5 millimeters and half the weight for your convenience.

While the stone base panel provides the strength and rigidity for the material, the pattern foil introduces the pristine beauty of the natural stones.

UV layer provides a high quality, polished surface which can be easily cleaned and maintained.

The protective film protects the surface during handling and installation and is removed after the panel is installed. Stone wall panels are completely rigid just like regular ceramic tiles or marble and they can be used both on walls and ceilings.

NORDIC SELECTION

Nordic selection aims to create elegant and spacious interiors through simplicity—creating living spaces full of light and grace. With the contrasting yet still natural color palette, you can create a greater sense of depth for cozy winter nights and joyful summer days.

PANEL & PALETTE SIZES

60 x 120 Panels (0.72 m²)

Ideal for installing the Izem Stone panels to specific parts in your interiors, creating a more tile like structure.

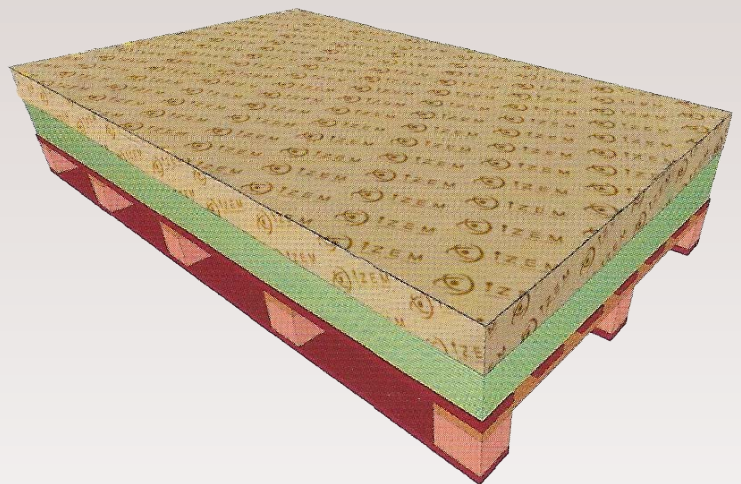

- 4 panels in 1 box (2.88m²)
- 80 boxes on 1 palette (230.4m²)

122 x 244 Panels (2.97m²)

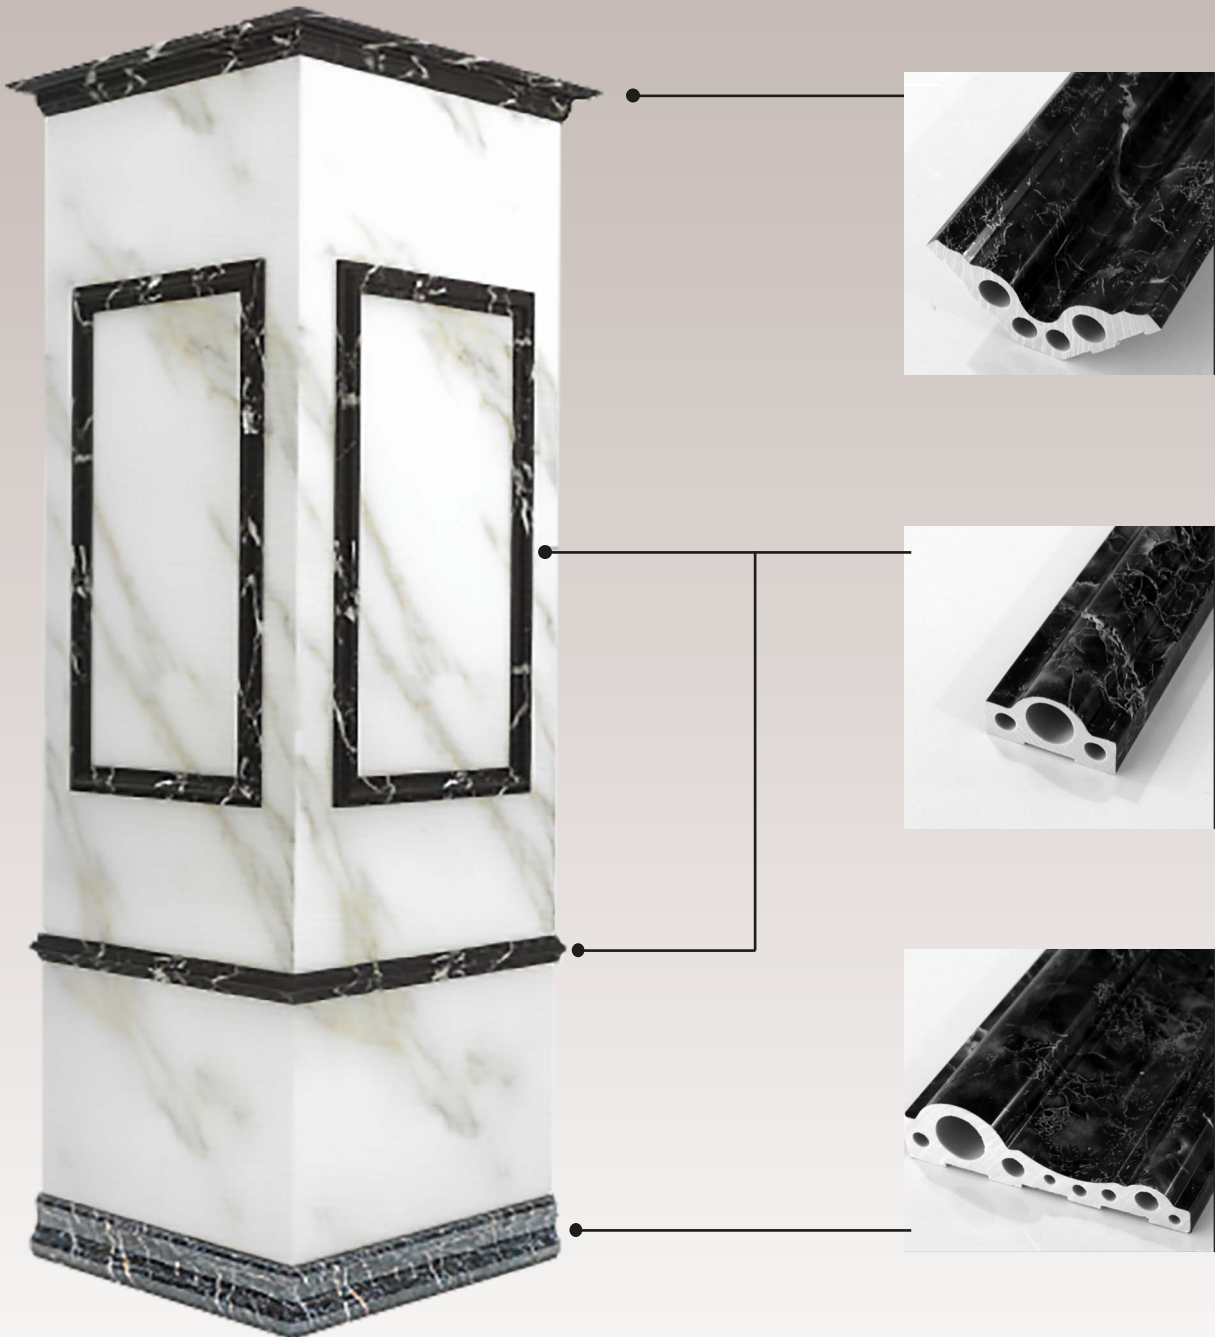

Recommended for larger surfaces. The single piece panel creates a greater sense of unity and depth without the interruption of the vein patterns in large areas.

- 80 panels on 1 palette (237.6m²)

MOLDINGS & EDGINGS

We have thought everything you need to create beautiful interiors with a fine finish without a hassle. A variety of edgings and profiles are also available both in Izem Stone and aluminum to achieve a flawless finish with Izem Stone panels.

MOLDINGS & EDGINGS

Izem Stone moldings and edgings are available in all patterns in our Nordic and Orient selections, and they share the same qualities with the wall panels. The embedded canals in their design also allow easy installment of power cables through them. Izem Stone moldings and edgings combine functionality with a refined finish for the panels.

NARROW INNER CORNER EDGING

WIDE MOLDING

NARROW PROFILE

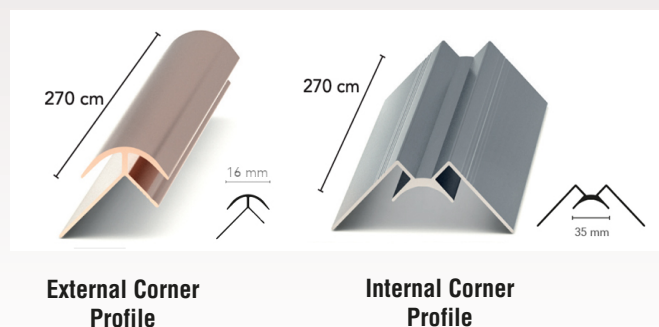

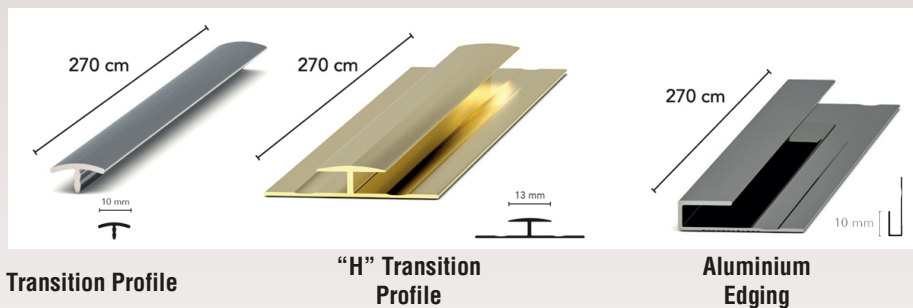

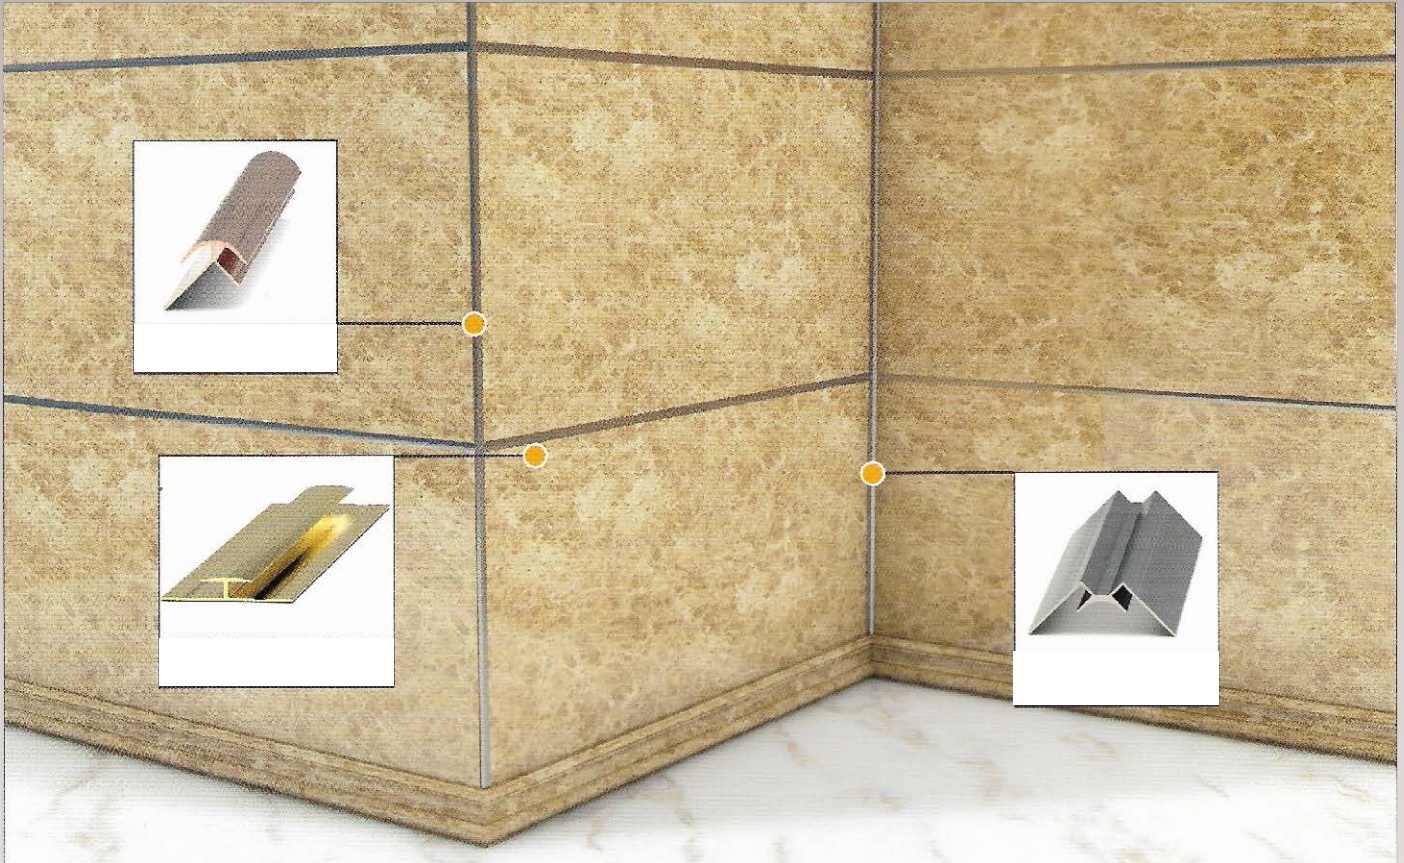

WIDE INNER CORNER EDGING

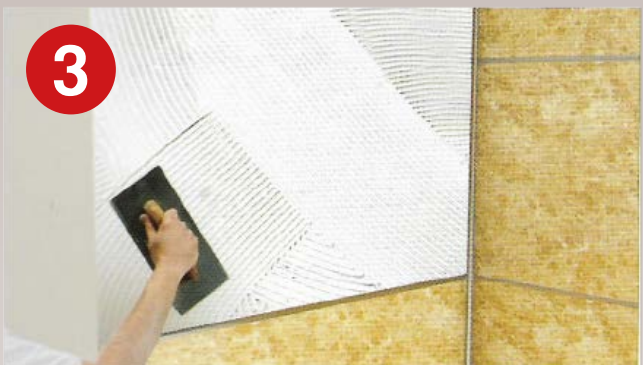

MID-SIZED MOLDING

ALUMINIUM MOLDINGS & EDGINGS

All aluminum edgings are available in three different colors: silver, rose, and gold. They are most suitable when a thinner finish is desired. Combined with Izem Stone moldings, aluminum profiles provide a sharper finish for your Izem Stone wall panels.

INSTALLATION

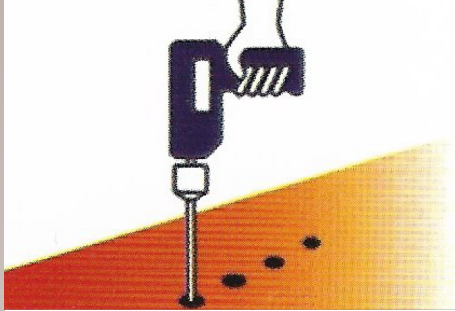

- 1 SURFACE CLEANING**
The surface is cleaned from any kind of lime paint, dirt, and other material before installing the panels.
- 2 SURFACE PREPARATION**
If the surface is uneven or faulty for adhesion (e.g. holes), the surface is repaired with a suitable primer.
- 3 ADHESIVE APPLICATION**
Acrylic based adhesive is applied by a rake to the prepared surface the panels will be installed.
- 4 PANEL INSTALLATION**
Izem Stone panels are installed carefully with the help of a rubber hammer. If desired, the edgings are also installed.

DECOKIM

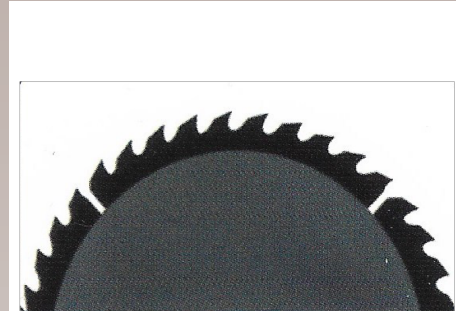

Decokim is an acrylic based adhesive with similar properties to Izem Stone. For a strong adhesion, water resistance, and warranty coverage; Izem Stone panels should be installed with Decokim. Decokim adhesive is available in 3 sizes: 3kg, 10kg, and 25kg.

PROCESSING

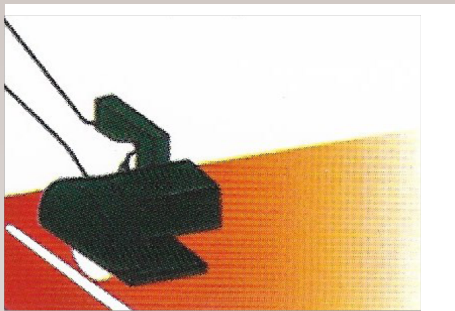

DRILLING

Izem Stone panels can be drilled by any kind of power drill.

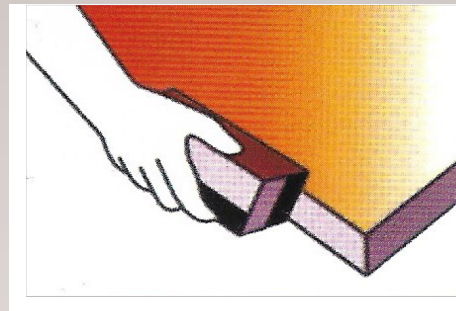

SIZING

Panels can quickly and easily be sized by using a table saw.

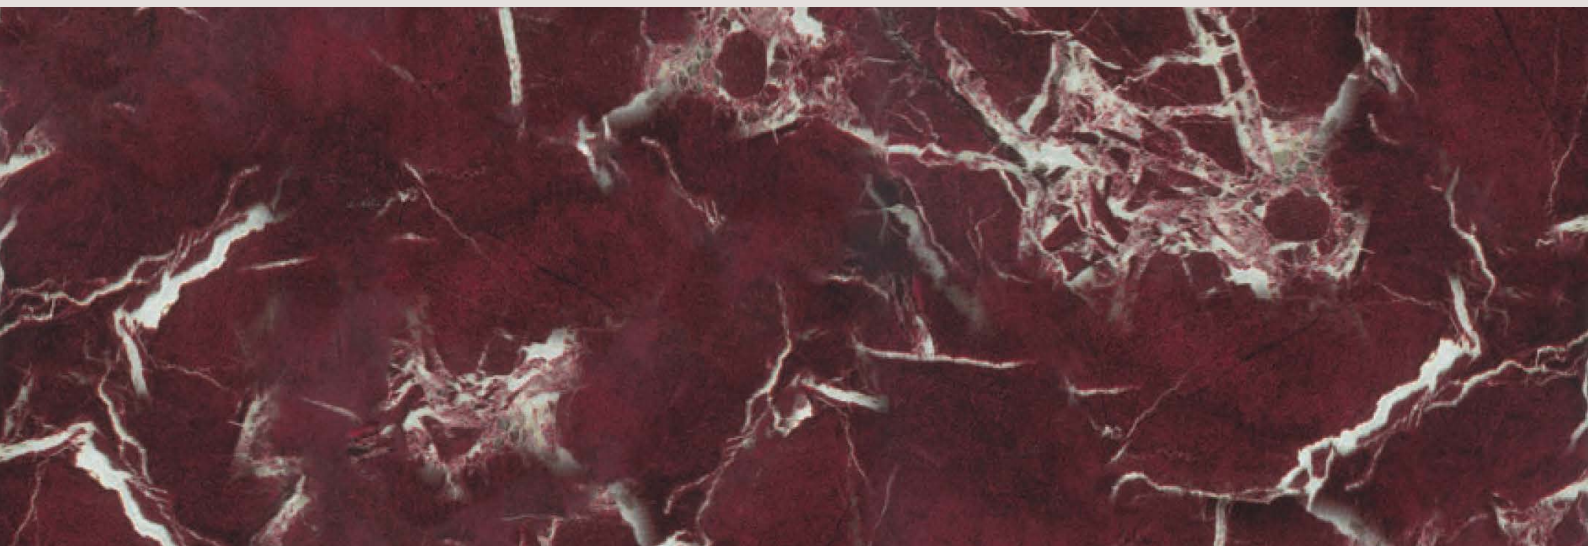

CUTTING

Circular saws and jigsaws can be used to shape the panels.

SANDING

Rough edges can be easily smoothed with a sand paper.

F.A.Q.

How long is the warranty period?

We provide 10 years warranty if the panels are correctly installed according to the installation manual. We guarantee that no cracks or color deformation will occur during the warranty period.

Can Izem Stone be used in wet rooms?

Yes. Izem Stone is water resistant and suitable for wet rooms. If installed according to the installation manual, it provides a water resistant surface.

Can Izem Stone be installed onto drywall?

Yes; but first, one layer of primer should be applied onto the drywall surface. Otherwise the drywall might cause excessive dust later on.

Can Izem Stone be installed directly onto the existing ceramic or marble surfaces?

Yes. Izem Stone can be installed directly onto the existing surfaces tiles and marble surfaces.

Can Izem Stone be used for floors?

Unfortunately no. Izem Stone wall panels are only suitable for walls and ceilings.

Can Izem Stone be installed directly to the walls of a shower stall or a bathtub?

Yes; but silicon filling should be used for the connection points of the panels with the shower stall or the bathtub.

How can I clean Izem Stone

It can easily be cleaned with a soft sponge and non-erosive detergents.

Can Izem Stone panels be stored vertically?

No. Izem Stone panels have to be stored horizontally.

How much does Izem Stone weight?

It weights 7.5kg/m².

Does Izem Stone transmit light?

No. Izem Stone panels are completely opaque.

Can you produce other patterns for Izem Stone panels?

Yes. Custom patterns are possible for orders above 5000m². We can even produce wooden surface patterns onto Izem Stone.
