MARBLE COLLECTION

ESN MERMER SAN. TİC. LTD. ŞTİ.
ESN मारबल उद्योग और व्यापार लमिटिड कंपनी

About Us

Our company was established in 2021, after 15 years of industry experience, to provide high quality marble supply services to every country in the world.

We are proud to present the stones extracted from various regions of Turkey to our customers with the highest quality and widest product range. We export natural stones to more than 20 countries in the world.

Our product range consists of marble blocks, slabs, tiles, tumbled travertine and mosaic groups.

Our Mission

The main goal of ESN Marble Company is to create an infrastructure based on innovation technology, efficiency, expertise and a positive work culture aiming at excellence.

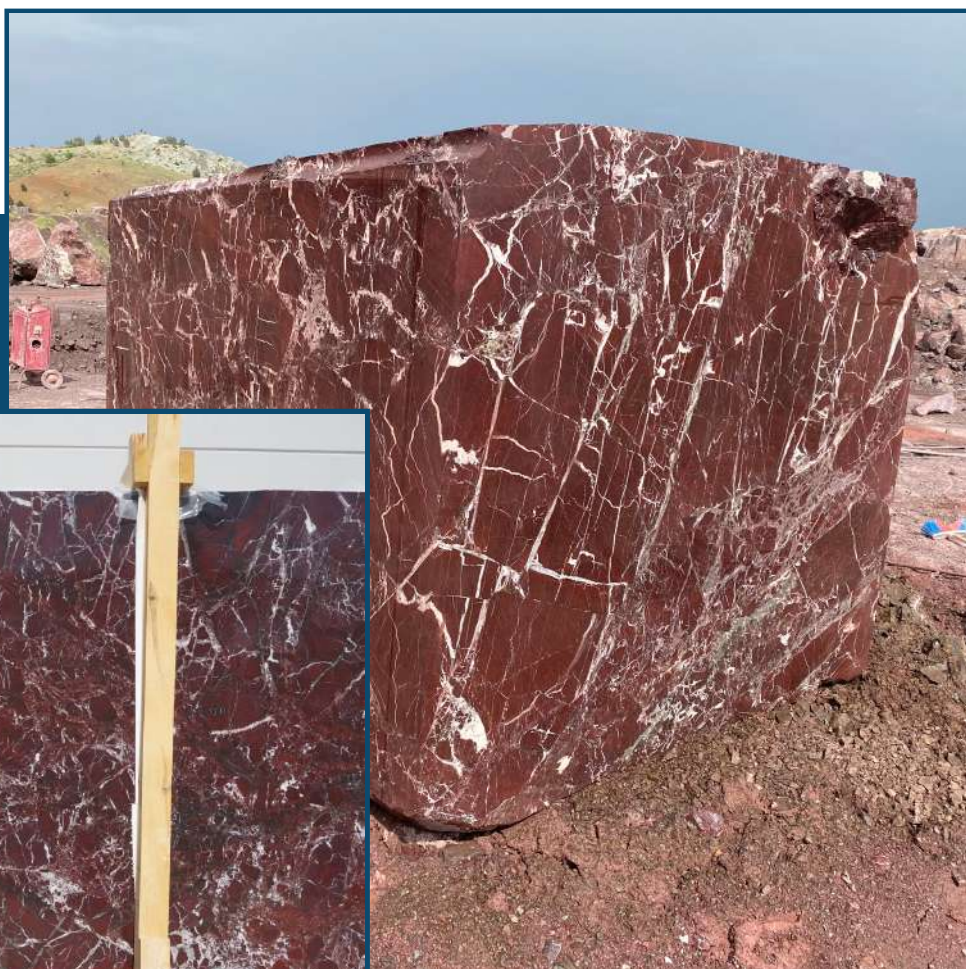

Our Vision

To provide competitive advantage to our customers with the variety of natural stones that come from our supply power.

ROSSO LEVANTO

"Rosso Levanto" is a dark cherry colored marble that attracts the attention of customers with its beauty and covers the white veins with a surprising spider web on its surface. Light lines and marble clumps create a unique pattern and depth of shadows. The use of Rosso Levanto marble brings a sense of luxury, aristocracy and refinement to the space. In terms of its physical and mechanical properties, this marble is suitable for many projects: countertops, wall and floor coverings in rooms. Rosso Levanto is used for the manufacture of fireplaces, stair treads, poles and windowsills, and for the design of stylish bathrooms and shelves. Thanks to its contrast, the decor will acquire an unforgettable integrity and exclusivity.

LIMESTONE

Limestone is a distinctive type of natural stone that can be preferred for several indoor and outdoor spaces. Limestone has a soft structure in contrast with other types of natural stones and it can be used as a cladding system. The limestone material has some different selection which we can describe with grain, sesame and fossil volume. Depends on the usage area, our customer would select the some less sesame, some fine grains or more big fossils and sesame selection like as Emales. Limestone walls and limestone paving are two different popular applications for outdoor use. Besides, crushed limestone which is another type of limestone can be preferred for interior and exterior projects. Limestone flooring is also popular for high traffic areas in your home thanks to its soft structure.
