ABOUT

Alparla is a **third-generation upholstery manufacturer** specializing in scalable, high-quality furniture production for hospitality, commercial, and residential projects.

With over 10,000+ annual production capacity, we support architects, interior designers, and developers by delivering reliable, cost-effective, and durable contract-grade furniture.

Our approach combines:

- Modern production workflows
- Efficient upholstery craftsmanship
- Consistent quality control aligned

with **Six Sigma principles**

- Flexible project-based collaboration

We operate as a scalable, solution-driven manufacturing partner — offering premium results with realistic production costs, tailored for contract work at any scale.

OUR SERVICES

We provide end-to-end contract furniture solutions:

Frame Construction

We build durable frames using reinforced hardwood and precision-cut plywood structures. Each joint is strengthened for long-term stability, creating a reliable foundation suitable for high-traffic commercial use and large-volume production.

Cushioning & Support

We calibrate foam density and layering to achieve optimal comfort and performance. Whether for lounge seating, dining chairs, or contract sofas, cushioning is tailored to the intended use—ensuring consistency, resilience, and long-term structural comfort.

Upholstery & Detailing

Our upholstery team applies clean paneling, precise stitching, and uniform tension control to achieve a refined, consistent finish. Fabrics are handled to maintain form and durability, ensuring that every unit matches perfectly across batches.

OUR SERVICES

We provide end-to-end contract furniture solutions:

Quality Control

Each product passes through structured QC stages aligned with Six Sigma principles. We inspect the frame, foam density, stitch alignment, fabric tension, and overall finish to ensure stable quality across every production batch.

Packaging & Delivery

Every item is securely packaged using multi-layer protection to prevent transport damage. We prepare shipments for global delivery, making sure products arrive in perfect condition—ready for installation in hospitality, commercial, and residential projects.

OUR EXPERTISE

We support contract and commercial projects **with structured, scalable, and quality-driven production processes** designed for consistency and long-term performance.

High-Capacity Production

With a capacity of 10,000+ units/year, we deliver:

- Consistent batch quality
- Reliable scaling for large or urgent

Technical Adaptation & Prototyping

We tailor every piece to project needs:

- Dimension + structure adjustments
- Material optimization
- Sample / prototype development

OUR EXPERTISE

We support contract and commercial projects **with structured, scalable, and quality-driven production processes** designed for consistency and long-term performance.

Contract-Grade Durability

All products meet high-traffic, long-term performance standards:

- Structural stability
- Foam density consistency
- Uniform appearance across units projects

Quality Control (Six Sigma Mindset)

We follow measurable QC checkpoints:

- Frame inspection
- Foam & density checks
- Stitch + fabric alignment
- Final finish control

We act **as a scalable manufacturing partner**, ensuring smooth coordination from start to finish.
