1.7) Summary of the facility's quality applications.

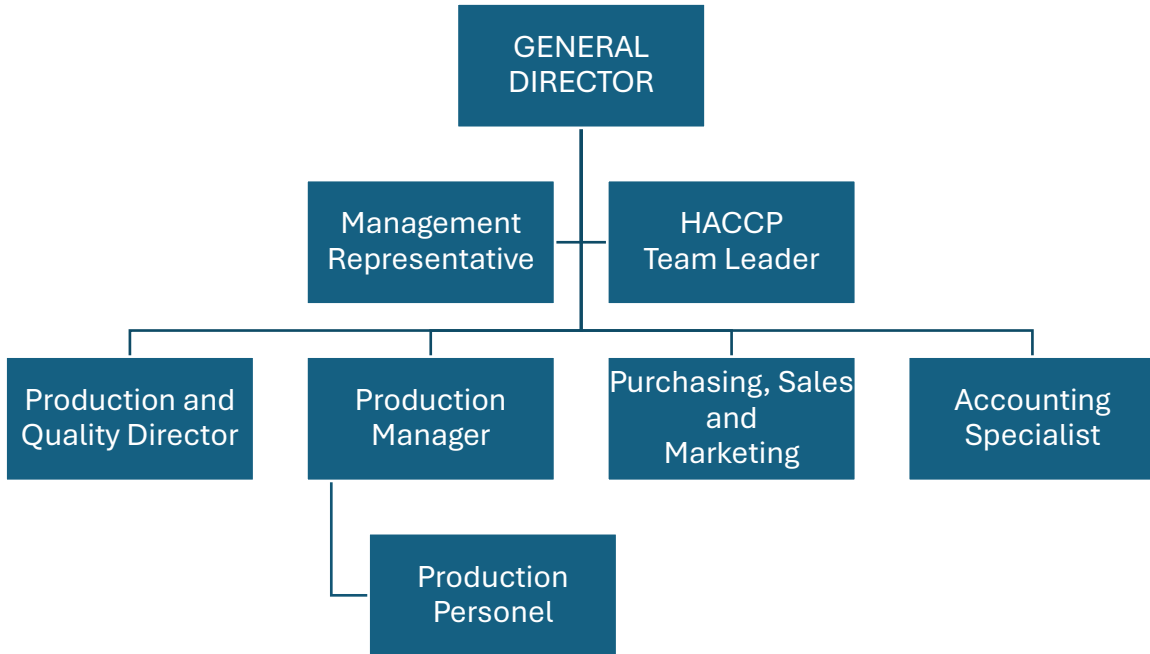

Our company adheres to rigorous quality standards to ensure compliance with the HACCP Food Safety System and the GMP System outlined in the ISO 22000:2005 Quality System.

We conduct thorough checks and adhere to prescribed procedures during raw material acceptance, production, and storage processes to uphold these standards.

Our commitment to quality is reflected in our annual inspections by both the Food, Agriculture, and Livestock Ministry and our certifying organization. We maintain comprehensive documentation for all manufactured products and prioritize product traceability.

Through these measures, we guarantee the safety and quality of our products, providing reassurance to our customers and demonstrating our dedication to excellence.

1.8) Organization Chart

2) Production

2.1) Short description of the production

Sepe Natural takes pride in its commitment to excellence in production. Our state-of-the-art facilities adhere to the highest industry standards and are equipped with cutting-edge technology to ensure the quality and purity of our products. From sourcing premium ingredients to meticulous manufacturing processes, every step is carried out with utmost care and attention to detail. Our dedication to quality and innovation drives us to continuously improve and deliver natural, effective, and safe supplements that support your health and well-being.

2.2) Production Type

Our company specializes in the production of various health products, including food supplements (capsules, tablets, oral liquids, and paste), honey, and cold-pressed oils. To ensure the highest standards of hygiene, the floors of our production areas and storage spaces are completely covered with an antibacterial material known as epoxy. Additionally, the walls of our production areas are also covered with epoxy and other antibacterial materials.
