Healthy Generations Healthy Future

Mothers' Number 1 Choice

Turkey's Follow-On Milk with Special Content

It contributes to your baby's bone development with the Calcium and Iron it contains.

It has two packages, 400g and 800g.

It is carefully produced for babies.

Carefully formulated for your baby's healthy growth and development,
the pride of the Bebehum brand, Follow-On Milk!

Bebehum is the first local brand in Türkiye to use hydrolyzed protein in baby food, which is a special product for baby digestion. It has a price competition and advantage over imported products of foreign origin in terms of production costs. Since all of the bebehum products are domestically produced and produced within the company, it is in an advantageous position in the market in terms of supply. Since many companies come to Türkiye with imports and limited quotas, they experience stock and supply problems at the end of the year. Since bebehum is produced in Türkiye, all analyzes and tests, including raw materials and production, are analyzed in universities and internationally accredited laboratories in Türkiye.

Bebelum brand is a Registered and Patented Brand of Gürler Global Mağazacılık San. Ve Tic. A.Ş. Our company was established in 2016 and also operates with Retail Stores where all baby and children's products are available under the BebeGen Brand. It has expanded its service network with e-commerce and export in Turkey and many parts of the world with the slogan of "Everything about your baby".

WHY BEBEHUM;

The Bebehum brand, with its slogan for Healthy Generations and a Healthy Future, was inspired by the nutritional needs of babies and was developed in well-equipped R&D laboratories by academicians and food engineers from the University who are experts in their fields and produced in Türkiye. Our products have HALAL, ISO 22000, HACCP Certificates.

It is available in different packages as 400 g, 800 g and 1200 g.

There are Bebehum baby and follow-on milks from number 1 to number 5.

(BEBEHUM-1 0-6 months Baby Milk

-BEBEHUM-2 6-9 months Follow-on Milk

-BEBEHUM-3 9-12 months Follow-on Milk

-BEBEHUM-4 +1 year Follow-on Milk

-BEBEHUM-5 +2 year Follow-on Milk)

It contributes to our baby's bone development with the iron and calcium it contains.

It contributes to our baby's brain development with the iron, zinc, iodine and B12 it contains.

It is very important for dental health thanks to the vitamins C and D.

It controls the body's water balance thanks to the potassium it contains and contributes to the regulation of blood pressure, heart rhythm and the development of muscle functions.

It is very useful for protecting children's eye health thanks to the selenium and zinc it contains.

WARNING: Breast milk is the ideal food source that contains all kinds of nutritional values such as protein, fat, iron and vitamins for the baby.

In cases where breast milk cannot be obtained or is not sufficient, Bebehum baby and follow-on milk can be used with the doctor's advice.

Vitamin And Mineral Source

Mineral

Brain Development

DHA is a critical fatty acid for brain and nervous system development. DHA plays an important role in babies' brain and eye development. DHA, naturally found in breast milk, supports babies' intelligence development and learning abilities. DHA added to baby food supports this development.

Eye Health

DHA is an important component of the eye retina and plays a role in the development of vision. It supports babies' visual perception and eye health.

Immune System

DHA may help the immune system function properly. Studies show that DHA has anti-inflammatory properties and may strengthen the immune response.

DHA is especially important for growth and development in babies' first year. Therefore, adding DHA to infant formula is especially beneficial for babies who are not breastfed.
