USES OF DRIED FIGS

Dried figs are not just a traditional snack; they are positioned as an indispensable "superfood" in the world of gastronomy and healthy living trends. **Premium Snacks and Energy Mixes:** With their high nutritional value, they are the main energy source in packaged healthy snacks and nut mixes known as "Trail Mix." With its refined sugar-free composition, it is the strongest natural alternative to chocolate and sweets. **Gourmet Charcuterie and Cheese Platters:** It is an indispensable accompaniment to luxury cheese platters and charcuterie presentations in world cuisine. It pairs perfectly with goat cheese, Brie, and aged cheeses. **Artisanal Baking and Pastry:** It is used as both a natural sweetener and a fiber source that improves texture in quality bread production, gluten-free muffins, and high-protein energy bars. **Modern Gastronomy (Salads and Main Courses):** In fusion cuisine, it is preferred to create a "sweet-salty" balance in a wide range of dishes, from salads containing fresh arugula, walnuts, and parmesan to white and red meat sauces. **Plant-Based and Functional Nutrition:** In vegan, Paleo, and raw diets, it serves as a nutritious base in smoothies, energy balls, and dairy-free desserts thanks to its high calcium and iron content.
