About Us

Founded in 2017 with the production of home fragrances, Istanbul-based Smella Kozmetik manufactures products such as home fragrances, car fragrances, colognes, personal perfumes, creams, liquid soaps, shampoos, and shower gels in compliance with GMP and ISO standards.

Depending on the product type, our company has a daily production capacity of approximately 10,000–20,000 units. Our production line is equipped with solid and liquid filling lines for mass production, as well as automatic cellophane wrapping machines for double-sided and wrap-around labeling processes. For small-batch production, we utilize semi-automatic perfume filling machines along with pneumatic liquid and cream filling machines.
