(Agriculture and Seedling Production)
Established in 1994

ELMASU / PUCCINELLI ELMATAŞ,
located in Isparta, south of TÜRKİYE,
was established in 1990 with an Italian
partner as a specialized and distinguished
factory producing dried food products
using tunnel drying technology.

Based in Isparta, a key apple-growing region, we integrate agricultural strength with industrial processing.

The apples that we use as raw material are grown in our plantation, and the apple plants are special plants that we got from Italy. The kinds of apples are Imperatore and Idared.

We supply consistent, high-quality ingredients to food manufacturers worldwide.

We supply dried apples in various industrial forms:

- Slices
- Dice (custom sizes)
- Chips
- Granules
- Powder (Apple Flour)

Moisture level: 3%

Result: high crunch & long shelf life

APPLICATION AREAS

Our dried apple products are widely used in:

1. Breakfast Cereals ✓

Used by cereal manufacturers in granola, muesli, and snack bars.

2. Bakery & Pastry ✓

Ideal for:

- Cakes
- Cream fillings
- Muffins
- Biscuits

✓ 3. Chocolate Industry

Suitable for chocolate coating and confectionery applications.

4. Snack Bars ✓

Used in:

- Fruit bars
- Energy bars
- Apple-based snacks

✓ 5. Healthy Retail Snacks

Packaged and sold as natural, additive-free snacks.

Our sliced and chip dried apple products are packaged in various sizes and offered for sale in chain supermarkets, taking their place on the shelves as a healthy snack. They have gained significant popularity due to the absence of added sugar, fat, salt, and other additives. In addition to chain supermarkets, they are also available in hotel minibars, cafes, and school canteens.
