# ABOUT US

Founded in 2013, Halk Hijyenik is among Turkey's leading and reliable manufacturers in the hygienic products sector. Since our establishment, we have been committed to quality, innovation, and sustainable growth, continuously creating value through our strong manufacturing infrastructure and production processes that meet international standards. Today, with products reaching millions of consumers and an export network spanning to more than 80 countries, we proudly serve as a reliable global partner in hygiene solutions.

With our strong position in the global market, our production power that competes with worldwide brands, high manufacturing standards, and a customer-oriented approach we increase our international success day by day. Thanks to our flexible production capability developed for international brands and private label manufacturing projects, we offer special solutions for the needs of different markets. At the heart of this success lies our innovative vision, continuous investment in research and development, and a management philosophy focused on continuous improvement.

Driven by innovation, advanced manufacturing technologies, and state-of-the-art production facilities, we continue to shape the future of the hygiene industry. By closely monitoring evolving consumer needs and market trends, we develop innovative solutions that meet the unique expectations of customers across diverse markets.

Our wide product portfolio consists of baby diapers offering high absorption power and superior comfort, feminine hygiene products providing maximum protection, adult incontinence products offering long-term use and high performance, wet wipes specially developed for babies and children, cleaning towels suitable for different areas of use, and body cleansing wipes developed for sensitive skin. All our products go through production processes that comply with international quality standards, prioritizing user safety, product reliability and human health.

As Halk Hijyenik, we view sustainability as an inseparable part of all our activities. We continuously improve our manufacturing processes by adopting environmentally responsible technologies, increasing energy efficiency, and making effective use of renewable energy resources. At the same time, we continuously improve our sustainable production approach by supporting the use of recyclable materials. Alongside environmental responsibility, *we view practices that support the development, occupational health, and safety of* our employees, as well as projects providing social benefit, as an inseparable part of our sustainability approach. Guided by our responsibility to future generations, we remain dedicated to building a more sustainable future while creating long-term value for our customers, partners, and communities.
